THE GEMINI PROTOCOL / THE GREEN ROOM ARCHIVE

THE CONTINUUM MASTER CHRONOLOGY

A dated map of the Hoshihara era
From Eikken Pójsiedysz to Vega: Cyber P.I.

2077 / 2125 / 2177 / 2180 / 2190

CONTINUITY EDITION 2.1 • 13 NOVEMBER 2026

Updated after the founder chronology and Vega case-file synchronization.

ACT 00 / THE NEW CHRONOLOGICAL ANCHORS

The new chronological anchors

Decisions made in November 2026 now fix the broad calendar framework. A precise year is used only when the creator adopted it or when it follows directly from an adopted age and interval.

2077	WORKING ANCHOR	**The nuclear devastation of Hoshihara** The world-history anchor adopted in the current planning chronology. The precise day of the attack remains unconfirmed; the previously mentioned 23 October date echoes Fallout and is not separately locked. **WORKING ANCHOR** · Current creator decisions / dev story update
2125	ADOPTED	**Eikken Pójsiedysz is born** Places the founder at about 65 in 2190. Childhood ages in the published biography can now be translated into approximate years. **ADOPTED** · Current creator decisions / dev story update
2146	ADOPTED	**Eikken starts the battery business at 21** He leaves correctional care at approximately 19 (2144), then launches his venture two years later. **ADOPTED** · Current creator decisions / dev story update
2177	ADOPTED	**Pura Grid reopens** A 100-year period of isolation after the 2077 catastrophe ends; the city begins repopulation and cultural recruitment. **ADOPTED** · Current creator decisions / dev story update
2180	ADOPTED	**Astra is killed at 28** Three years into Pura Grid’s reopening, its corporate talent drive finds Astra. Her refusal precedes her killing and resurrection as Velintra. **ADOPTED** · Current creator decisions / dev story update
2190	ADOPTED	**The modern TGP reference year** Ten years after Astra’s death. Vega: Cyber P.I. is set in April 2190, as confirmed by the updated Episode 01 manuscript. **ADOPTED** · Current creator decisions / dev story update

Read this as a working date lock, not a blanket retcon. Undated parallel stories remain undated. The release or publication year 2026 is never automatically an in-universe year.

ACT 01 / HOSHIHARA AND PURA GRID: THE CENTURY

Hoshihara and Pura Grid: the century

The catastrophe and the uneven recovery create the social divide that later character stories inhabit: weathered Hoshihara outside, capital-rich Pura Grid inside the barrier.

2077 WORKING ANCHOR	**Nuclear strikes decimate Hoshihara-shi** Massive destruction changes Hoshihara's urban and economic trajectory. The surviving city gradually reuses, repairs and repopulates its old infrastructure; it is weathered, not simply abandoned. **WORKING ANCHOR** · Hoshihara lore / creator timeline
2077–2177 WORKING ANCHOR	**Pura Grid's protected isolation** Its barrier/geo-dome and continuity infrastructure shelter the corporate population. The defense mechanism is deliberately not limited to a linear projection of 2026 technology; breakthrough physics remains unassigned. **WORKING ANCHOR** · Creator timeline / barrier discussion
2177 ADOPTED	**The gates reopen and repopulation begins** After a century apart, Pura Grid seeks residents, investment, employers, cultural institutions and performers. Its citywide talent campaign supplies the later setting for its recruitment of Astra. **ADOPTED** · Creator timeline, Nov 2026
2177–2180 DERIVED	**Three-year repopulation phase** The period between reopening and the corporate approach to Astra. Pura Grid is already functioning as an ambitious recruitment destination rather than discovering talent the moment the barrier opens. **DERIVED** · 2177 reopening + three-year interval
By 2180 ESTABLISHED	**Resurrection Protocol is public knowledge** An advertised, extremely costly commercial procedure for medically/genetically compatible clients; publicly framed as a way to recover life or escape terminal disease. Its original development year and supplier are not yet dated. **ESTABLISHED** · Velintra lore / The Lazarus Paradox

Chronological check: Astra's death in 2180 is 103 years after the 2077 catastrophe. Modern Hoshihara in 2190 is 113 years post-strike, consistent with the older "more than a century" description.

ACT 02 / EIKKEN: THE FOUNDER'S EARLY YEARS

Eikken: the founder's early years

The present-day figure can remain alive and active in 2190 without being implausibly ancient. Ages four, five, six and fifteen come from his published biography; the calendar dates below follow the newly accepted 2125 birth anchor.

2125 · age 0
ADOPTED

Eikken is born in Hoshihara

A scientifically precocious child whose biography begins TGP's main character-centered continuum, though the world's catastrophe predates him.

ADOPTED · Creator age/year decision

2129 · age 4
DERIVED

Early musical talent

Already plays piano, foreshadowing the combination of analytical and creative capacities that define him.

DERIVED · Lore: Eikken Pójsiedysz

2130 · age 5
DERIVED

Language and spelling aptitude

His spelling achievement attracts attention; childhood talent does not spare him an increasingly difficult home and school life.

DERIVED · Lore: Eikken Pójsiedysz

2131 · age 6
DERIVED

Accelerated scientific education

A tutor introduces advanced mathematics, physical systems and electricity. His biological father's death, adoption by a Polish stepfather and abuse belong to childhood but have no fixed years.

DERIVED · Lore: Eikken Pójsiedysz

2140 · age 15
DERIVED

Family and school shootings; arrest

The catastrophic acts that end his adolescence lead to incarceration in a countryside juvenile correctional / psychiatric institution.

DERIVED · Lore: Eikken Pójsiedysz

~2140–2144
APPROXIMATE

The forest institution

Aging batteries, unreliable power and workshops become his informal engineering laboratory. Staff help channel his talent toward practical energy management. An unauthorized departure followed by a voluntary return occurs during this general phase; exact timing open.

APPROXIMATE · Lore / childhood working notes

2144 · age 19
ADOPTED

Release from correctional care

Proposed release age: 19, four years after the age-15 incarceration, leaving two years before the business launch.

ADOPTED · Creator working chronology

2146 · age 21
ADOPTED

Battery business established

Eikken begins with reliable energy-storage products and applied power management, not an instantly dominant trillion-credit empire.

ADOPTED · Creator working chronology / Lore

ACT 03 / EIKKEN'S SCIENTIFIC PRIME AND THE CORPORATE WEB

Eikken’s scientific prime and the corporate web

Years for the later breakthroughs are modelled working windows, not separately dated events. Their order is more strongly established than their precise year.

~2150–2158 age 25–33 MODELLED RANGE	**EK4U breakthrough and early corporate wealth** Eikken moves from improved batteries into revolutionary energy storage and power management, later earning Nobel-level recognition. Precise year of his Nobel award remains unassigned. **MODELLED RANGE** · Lore: Eikken / Velvet Horizons
~2158–2165 age 33–40 MODELLED RANGE	**Velvet Horizons expands; Cybernetigo is acquired** Eikken’s company absorbs Cybernetigo Dynamics’ android and cognition technology. The energy architecture is combined with sophisticated synthetic bodies, enabling expanded commercial and entertainment lines. **MODELLED RANGE** · Lore: Velvet Horizons
Before acquisition ESTABLISHED ORDER	**Cybernetigo’s Maid4You lineage and Andreia** Charlie and early household androids precede later generations. Andreia is built and privately sold before Eikken buys Cybernetigo; her eventual story with Marco does not need to happen this early. **ESTABLISHED ORDER** · Cybernetigo / Andreia working lore
After acquisition ESTABLISHED ORDER	**PleasureCells and NiNa** Velvet Horizons develops the companion-android business and NiNa (VH-0094-PC) as an EK4U-powered prototype. The elevator/Studio Four incident belongs to her qualification phase; its exact year remains open. **ESTABLISHED ORDER** · Lore: NiNa; Fiction: NiNa: All You’ve Got
~2165–2175 age 40–50 MODELLED RANGE	**Eikken’s prime: Pussycats, Tailbreakers, and C.A.A.T. foundations** The newly adopted age anchor places the major combat research in Eikken’s prime. The dates are a plausible working envelope rather than an exact origin/activation timestamp. **MODELLED RANGE** · Creator Nov 2026; Lore: Tailbreaker/C.A.A.T.s
By 2190 age ~65 ADOPTED	**Eikken remains an active elder industrialist** The founder can still attend the Hoshihara Crucible with Reika and Shion and preside over Velvet Horizons, while younger programs and operatives continue evolving. **ADOPTED** · Founder chronology decision

ACT 04 / FROM THE ARENA TO LIVING OPERATIVES

From the arena to living operatives

The combat lineage is one of the best supported dependency chains. Tanya’s field experience and genetics, the Pussycats’ telemetry, and synthetic-cell biology are separate contributions that converge in Specimen 9.

In Eikken's prime	ESTABLISHED	**Cliff Pussycats are developed** Ryet (force), Vixyn (speed) and Reyvin (precision) serve as distinct android athletes. Their public ears and tails are modular accessories, not natural anatomy; Reika and Shion are different executive-security gynoids. **ESTABLISHED · Lore: Eikken / Tailbreakers**
In Eikken's prime	ESTABLISHED	**Tailbreakers becomes a spectator laboratory** At the Hoshihara Crucible, three Pussycats face teams of six augmented humans using the NOMAD-07 orb. The matches are commercial spectacle and instrumented combat research. **ESTABLISHED · Lore: Tailbreaker Project; Fiction: Look At Them**
After early matches	ESTABLISHED	**21st-floor simulation and Tanya's training** Velvet Horizons' Performance Engineering & Diagnostics reconstructs match telemetry. Tanya trains Ryet, Reyvin and Vixyn; Reyvin's superior adaptability informs research discussions. **ESTABLISHED · Creator working lore: 21st-floor hub**
Later within prime	ESTABLISHED ORDER	**Research pivots toward synthetic humans** The P.U.S.S.Y. project does not simply produce another android. It shifts to a synthetic founding cell and redesigned genome for living, biologically constrained human-shaped operatives. **ESTABLISHED ORDER · Lore: C.A.A.T.s / founder working lore**
Before Specimen 9	ESTABLISHED ORDER	**Tanya's special-operations career** Marine service, BUD/S, DEVGRU and CIA black operations precede her role as experimental equipment tester, genetic reference and later mentor. Her birth year remains unsettled. **ESTABLISHED ORDER · Lore: Tanya D'Gaul**
Before 2180	BOUND ONLY	**Specimen 9 and the C.A.A.T.s** Tanya supplies a human genetic reference. Velvet Horizons develops engineered biological operatives, eventually organizing teams under the C.A.A.T.s; Erika/Kestrel's unit includes Miyaka, Daryna and Silvija/Pulse. **BOUND ONLY · Lore: C.A.A.T.s**
Before 2180	BOUND ONLY	**Sayaka's embryo is stolen** An unidentified RIVAL corporation takes a Specimen 9 Alpha embryo from Velvet Horizons. It had failed six earlier proprietary attempts; developing the stolen embryo as Unit-07 succeeds. **BOUND ONLY · Lore: Sayaka-san**
Before 2180	BOUND ONLY	**Unit-07 conditioning and operations** Sayaka is redirected from intended team leadership into solo corporate assassination. Her private life is surveilled; her judgment exists within coercive operational control. She is capable of serving before Astra's death. **BOUND ONLY · Lore: Sayaka-san / creator working lore**

Ownership guardrail: Velvet Horizons creates Specimen 9. The unnamed rival steals Sayaka, controls Unit-07, and later orders Astra's killing and unauthorized resurrection. These corporations must not be conflated.

ACT 05 / ASTRA: A LIFE BEFORE VELINTRA

Astra: a life before Velintra

Astra dies at 28 in 2180. Her nominal birth year is therefore approximately 2152 (depending on birthday and month of death). Not every scene during her human life can responsibly be assigned a specific year.

~2152 DERIVED	**Astra is born** Approximate birth year derived from age 28 at death in 2180. She grows up decades after the Hoshihara catastrophe. **DERIVED** · Creator age/date anchor
Before 2180 ESTABLISHED	**Life as a Hoshihara singer** Performs at Kei Kubo / The Scrapyard; values ordinary independence and repairing worn ponkotsu tractors. Her truck Sunny is YELLOW, not orange. **ESTABLISHED** · Velintra prologue / friendship lore
Before 2180 ESTABLISHED	**Raffy / Raphael relationship** Astra meets the fighter in rainy Hoshihara, shares intimacy and routine, and later experiences the relationship's ending. Exact courtship dates remain unassigned. **ESTABLISHED** · Music: Between Smoke and Rain / working lore
Before 2180 ESTABLISHED	**Astra and Sayaka become friends** Sayaka repeatedly visits The Scrapyard. Astra values her reserved visitor's unusual insight and mechanical curiosity; she does not know Sayaka is Unit-07 or Specimen 9. **ESTABLISHED** · Friendship dossier / working lore
Before 2180 ESTABLISHED / PROPOSED	**The stalled Sunny and Jettyroot interludes** An evening with Sunny's breakdown and a proposed Jettyroot weekend of implausibly precise molerat "pest control" belong to the friendship. Their internal order is still undated. **ESTABLISHED / PROPOSED** · Friendship lore / Jettyroot scenes
Before 2180 ESTABLISHED	**Raffy departs** Raffy leaves Astra. Their shared routines become reminders of a relationship she is still struggling to release. **ESTABLISHED** · Raffy / Raphael lore
After Raffy ESTABLISHED	**Fox-mug** The fox on a mug, its chipped rim and the lingering rituals of home carry Astra's memories of Raffy. **ESTABLISHED** · Song: The Ghost in Every Song
Before 2180 ESTABLISHED	**The Sayaka phone call** Astra confides in Sayaka about Raffy, cold coffee, cafés and books. Their last mutually remembered conversation. **ESTABLISHED** · Friendship transcript / song provenance

2180 ADOPTED	**Corporate discovery and refusal** During Pura Grid's third repopulation year, recruiters seek Astra's services. She rejects the proposed Pura Grid life and elects to remain independent. **ADOPTED · Creator chronology**
2180 · ~02:17 ADOPTED	**The final encounter outside Sunny** Days after the telephone call, the conditioned Sayaka watches Astra perform, shares coffee and bagels, and approaches Sunny with her. A fragment of her own will permits a non-romantic goodbye kiss before the compelled shooting. **ADOPTED · Creator assassination scene**
2180 · aftermath ESTABLISHED	**The murder is erased from Sayaka's accessible memory** Sayaka does not know she killed Astra. The operation and gun are inaccessible; an inexplicable recurring dream of kissing her friend persists without its meaning. The precise suppression mechanism remains open. **ESTABLISHED · Creator working lore**

ACT 06 / 2180 ONWARD: THE RESURRECTION PROTOCOL

2180 onward: the Resurrection Protocol

Astra's death does not negate her continued identity as Velintra. The unauthorized resurrection and deliberate autobiographical siloing are foundational TGP lore, explored in "The Lazarus Paradox."

2180 or later ESTABLISHED	**Astra is resurrected without consent** The SAME rival corporation that controls Sayaka uses the publicly known Resurrection Protocol to reconstruct Astra after ordering her death; it deliberately partitions autobiographical context to prevent a return to her former autonomy. **ESTABLISHED · Velintra lore / The Lazarus Paradox**
After resurrection ESTABLISHED	**Velintra awakens** She is Astra, not a copy, but lacks meaningful access to her former life and people; voice, emotional capacity and temperament remain. Her initial awakening date is not separately established. **ESTABLISHED · Velintra lore**
Undated interval ESTABLISHED	**Deyta finds his sister** Deyta, Astra/Velintra's sibling, discovers her after the protocol (circumstances unspecified). Deyta Kong-Doo-Ett, a secret archivist collective, becomes an important stabilizing affiliation. **ESTABLISHED · Friendship dossier / creator notes**

After Astra's absence ESTABLISHED	**Sayaka looks for her friend** She first assumes Astra has private reasons for not appearing at The Scrapyard, considers calling, visits again, then asks around and learns she has died. Her concern is sincere. **ESTABLISHED** · Creator working lore
Same night, year open ESTABLISHED	**First Olive Glaze performance and recognition** Sayaka hears Velintra and recognizes details others miss: voice, manner and subtly revised facial structure. The possibility that this is Astra compels her to enter the private green room. **ESTABLISHED** · Creator Olive Glaze scene
Minutes later ESTABLISHED	**The dressing-room exchange** Velintra, at her mirror in the noir/high-tech room, says, "You're not supposed to be here." Sayaka answers from shadow: "You're not supposed to be here either," and leaves in unseen tears. **ESTABLISHED** · Creator Olive Glaze scene
Later, before Apr 2190 ESTABLISHED	**Velintra's Gift and Corner of Dawn** Velintra knows Sayaka's Specimen 9 struggle through the archivists, but cannot recall their friendship. Her songs acknowledge Sayaka's dignity and strength; Sayaka's later tears are distinct from the earlier dressing-room grief. **ESTABLISHED** · Music / friendship dossier
After first encounter PROPOSED SCENE	**The cloaked "Sayaka-san" stage impression** In a playful performance, Velintra imitates the mythic assassin without knowing her face. Sayaka laughs spontaneously in her corner, sees a flicker of Astra's old humor, then regains composure. Exact ordering against the Gift songs remains open. **PROPOSED SCENE** · Creator working vignette

Sequence constraint: 2180 killing resurrection Velintra's later public life Sayaka's first Olive Glaze recognition later Gift/Corner songs. The exact years of the dressing-room encounter, Deyta's discovery, and the songs remain open.

ACT 07 / PARALLEL LIVES AND OPERATIONS, YEARS OPEN

Parallel lives and operations, years open

These arcs can occupy the late 2170s, 2180s or modern era only where a source supports it. Their publication dates are not evidence of when the fiction happens.

After emergence of C.A.A.T.s UNDATED	**Same Eyes and modern field work** Aida encounters another operative with recognizable Specimen 9 physiology. Erika's squad and other C.A.A.T.s continue operations; specific deployments are not yet calendar-dated. **UNDATED** · Fiction: Same Eyes / Lore: C.A.A.T.s

Undated UNDATED	**Tanya’s operations and K’hraal**	Three Floors Down, Almost Meow and The Other Woman portray field-period Tanya and her cat K’hraal. Current lore also describes a later MIA/civilian-amnesia state; the transition is unresolved. **UNDATED · Lore: Tanya / published Fiction**
Undated UNDATED	**Sayaka’s Legionnaire relationship**	An ARRTEMIS SIGINT operative observes Sayaka, later shielding her from surveillance; their intimacy underlines her fear that Corporate can weaponize attachments. No date relative to Astra’s killing has been fixed. **UNDATED · Lore: The Legionnaire**
Undated UNDATED	**Kaeshi Masamune / Entrapment**	Sayaka pursues the sword rather than a killing target while syndicate boss Valdés develops an entrapment operation. The antique blade is older than the mission. **UNDATED · Kaeshi archive / music**
Undated UNDATED	**Andreia and Marco: Sunset Pretty at the Park**	Andreia is a pre-acquisition Maid4You product, but her developing romance with Marco may be much later. The story is In Development even where individual character facts are established. **UNDATED · Andreia working lore**
Undated UNDATED	**NiNa: All You’ve Got**	PleasureCells-era prototype and Studio Four mishap. The printed 2123 date appearing on NiNa promotional material is not adopted as the incident year and conflicts with the newly mapped 2125 founder birth. **UNDATED · Lore: NiNa / Fiction**
Undated · December UNDATED	**Shō-Tōkyō: Hold My Chicken**	Vega and Tommy spend a rainy December evening in Hoshihara-shi. The romantic/biographical placement against Vega’s Pura Grid detective plot remains an open continuity dependency. **UNDATED · Published Fiction**
Timeless / open UNDATED	**Jettyroot slices and Nabera interlude**	Jettyroot refuge stories and the unusual Nabera dream narrative are real pieces of the fiction, but they do not provide transferable calendar anchors. **UNDATED · Jettyroot lore / A Nabera Interlude**

ACT 08 / 2190: VEGA’S CYBER P.I. CASE

2190: Vega’s Cyber P.I. case

The in-universe opening dates of “The Sunshower” were updated directly in the dev-branch Fiction manuscript on 13 November 2026; that is different from its publication metadata, also dated November 13, 2026.

Apr 17, 2190 DATED / UPDATED	**Warehouse 135 case-file date** The manuscript now explicitly states “Case File: 04-17-2190.” An earlier roleplay source had abbreviated 04-17-26; the 2190 in-universe date supersedes it. **DATED / UPDATED** · Fiction: The Sunshower, dev commit 66c12995
Apr 18, 2190 05:05 PST DATED / UPDATED	**Opening investigation, Lower Ward** Vega’s published story begins in Pura Grid’s Sector 4 canals; she meets Ravyn at Warehouse 135 amid signs of a Pyre-Cluster Emitter/Sunshower-class blast, a melted jacket and flashbang evidence. **DATED / UPDATED** · Fiction: The Sunshower, Episode 01
Apr 18, 2190 SAME EPISODE	**Nexus-9 and the Sayaka–Artemis hypothesis** The investigators connect corporate retrieval teams, unauthorized archive keys, distinctive thermal damage and evidence of a confrontation. Sayaka’s role is suspected through established Warehouse 135 song lore, not resolved as a complete case. **SAME EPISODE** · Fiction: The Sunshower / Sayaka no Kokoro album
After Episode 01 LATER / DATE OPEN	**Motel and encrypted dossier delivery plan** Later developing canon: Vega and Ravyn intend to reach the Olive Glaze, establish visual contact with Velintra and transfer decrypted Specimen 9 files over local short-range radio rather than cellular networks. **LATER / DATE OPEN** · Vega: Cyber P.I. development

Time-label safeguard: An early conversation used 04:50 PST for the case. The current Episode 01 text opens at **05:05 PST on April 18, 2190**. This edition follows the manuscript and does not silently merge the two timestamps.

ACT 09 / CONTINUITY MATRIX AND DATE AUDIT

Continuity matrix and date audit

What can now be treated as an anchor, and what must remain editorially open.

Newly fixed anchors

- 2077: nuclear devastation year, adopted for the current TGP timeline; exact month/day not locked.
- 2125: Eikken’s nominal birth; 2140 at 15, 2144 release at 19, 2146 business launch at 21.
- Eikken’s scientific prime / C.A.A.T.s development: approximately 2165–2175 as a working placement, not an exact founding year.
- 2177: end of the 100-year Pura Grid closure and start of the repopulation campaign.
- 2180: corporate discovery/refusal, Astra’s murder at 28; nominal birth around 2152.
- 2190: modern story anchor; Vega’s case-file April 17 and opening scene April 18 at 05:05 PST.

Still open - do not quietly date these

- Exact day of the nuclear attacks. “October 23” would import Fallout’s date unless separately chosen.
- Specific EK4U, Nobel, Cybernetigo acquisition, NiNa activation, Tailbreakers launch, Specimen 9 theft and C.A.A.T.s founding years.

- Tanya's exact birth age, MIA incident and reappearance; chronology of her field vignettes and the 21st-floor training.
- Sayaka's operational-memory suppression mechanism, the exact delay from Astra's death to resurrection, and the Olive Glaze encounter year.
- Which year the Legionnaire, Kaeshi/Entrapment, Andreia/Marco and Shō-Tōkyō stories occur; their relationship to April 2190.
- The 2123 NiNa magazine/artwork date; re-evaluate it as a diegetic date before using it to place story events.

Guardrails retained from edition 1.0

- Velvet Horizons developed Specimen 9; a different, still unidentified corporation stole Sayaka and later controlled Astra's killing and resurrection.
- Astra and Velintra are the same woman, with deliberately siloed personal context; Deyta is her sibling and Deyta Kong-Doo-Ett an archivist organization.
- Sayaka is a living synthetic biological organism; C.A.A.T.s are living operatives, while NiNa and the Pussycats belong to different android lines.
- In-world event dates are not the same as 2026 website publication or music release dates.
- Hoshihara's Shō-Tōkyō district is not Pura Grid; the Vega/Tommy vignette cannot be relocated just because it features Vega.

ACT 10 / PROVENANCE AND REVISION RECORD

Provenance and revision record

Edition 2.0 updates the dated skeleton of the earlier 14-page Master Chronology while retaining its identity, event-order and editorial safeguards.

Primary records

- **TGP Lore:** Eikken Pójsiedysz, Velvet Horizons, C.A.A.T.s, Tailbreaker Project, Tanya D'Gaul, Sayaka-san/Unit-07, NiNa, the Legionnaire.
- **TGP Fiction:** Look At Them, NiNa: All You've Got, Same Eyes, Three Floors Down, Almost Meow, The Other Woman, Hold My Chicken, and Vega: Cyber P.I. Episode 01 - The Sunshower.
- **Archival files:** Velintra Lore Session (10 March 2026); Hoshihara-shi; Astra–Sayaka Friendship Lore Dossier v1.1; Kaeshi Masamune Arc Brief; Jettyroot Lore Page; Hoshihara/Jettyroot Christmas continuity archive.
- **Music / concept records:** The Lazarus Paradox; The Ghost in Every Song; Sayaka no Kokoro; Velintra's Gift: Sacred Flame; Corner of Dawn; Warehouse 135: Sayaka Cornered.
- **Latest creator decisions:** 2077217721802190 anchor; Eikken 2125 / 2140 / 2144 / 2146; C.A.A.T.s during Eikken's scientific prime; Astra dies at 28, ten years before Vega's case.
- **Repository verification:** tonyandsable-tgp/the-gemini-protocol, dev branch, content/fiction-stories.json; 2190 case-file edit committed as 66c12995c6fa631bee79380c35f70436e285d4d6.

Editorial policy

Dates tagged **ADOPTED** are the creator's current working anchor. **DERIVED** values are arithmetic consequences of those anchors; **MODELLED RANGE** remains a provisional placement, and **UNDATED** items should not be treated as occurring in 2190 merely because they appear on contemporary pages. This report is a Green Room reference, not an automatic Canon promotion of every uncertain detail.

ARCHIVE NOTE / This chronology is a living continuity document. Update the calendar first, then preserve the source and version of any affected scene.
